

ACT REPORT

1. WHAT TYPE OF DOG STAGE HAS MORE LIKES ON AVERAGE

Using python group by function I could group by the dog_stage column and target the favourite counts columns and calculate the mean

```
doggo    26619.00000
floof    8015.86536
pupper   33983.00000
puppo    27088.50000
```

- The dog stage pupper has more like on average from 2015 to 2017

2. WHAT TYPE OF DOG STAGE HAS THE HIGHEST NUMERATOR RATINGS ON AVERAGE

Using python group by function I could group by the dog_stage column and target the dog ratings numerator columns and calculate its mean

```
doggo    13.000000
floof    18.531743
pupper   12.333333
puppo    13.000000
```

- The Dog Stage with the most ratings of numerators is floof from 2015 to 2017

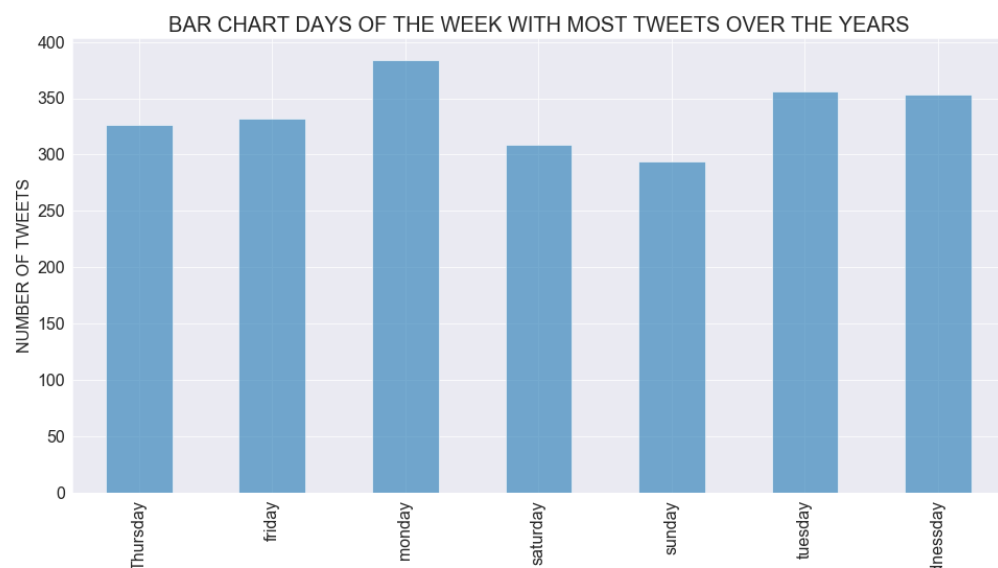

3. WHAT DAY OF THE WEEK HAS MORE TWEETS OVER THE YEARS

Using python group by function I could group by the days tweeted column and count how many times there was a tweet in each day from 2015 to 2017

Thursday	326
Friday	332
Monday	384
Saturday	309
Sunday	294
Tuesday	356
Wednesday	353

- This shows the number of times the tweeter account as tweeted each day of the week from 2015 to 2017

4. WHICH DOG STAGE ON AVERAGE HAS THE MOST LIKES IN EACH YEAR

- Year tweeted, Dog stage, Favourite Count

- 2015	floof	2519.078261
2016	floof	6997.131134
2017	pupper	33983.000000

- This results shows the dog stage on average floof has more like in both 2015 and 2016 but was over taken by the dog stage pupper by 33983.000000

5. NUMBER OF RETWEET VAS TWEET OVER THE YEARS

- 2015 the was 685 tweet vas 5 retweet
- 2016 the was 1081 tweet vas 101 retweet
- 2017 the was 398 tweet vas 84 retweet

6. WHAT PERCENTAGE OF TWEETED PICTURES THAT WAS ACCUALY DOG AND WHAT PERCENATGE OF TWEETED PICTURS THAT WERE NOT ACCUALY DOGS FROM THE NUREL NEWTWORK PRIDICTIONS?

Prediction 1 of dogs

False 24.891462
True 70.911722

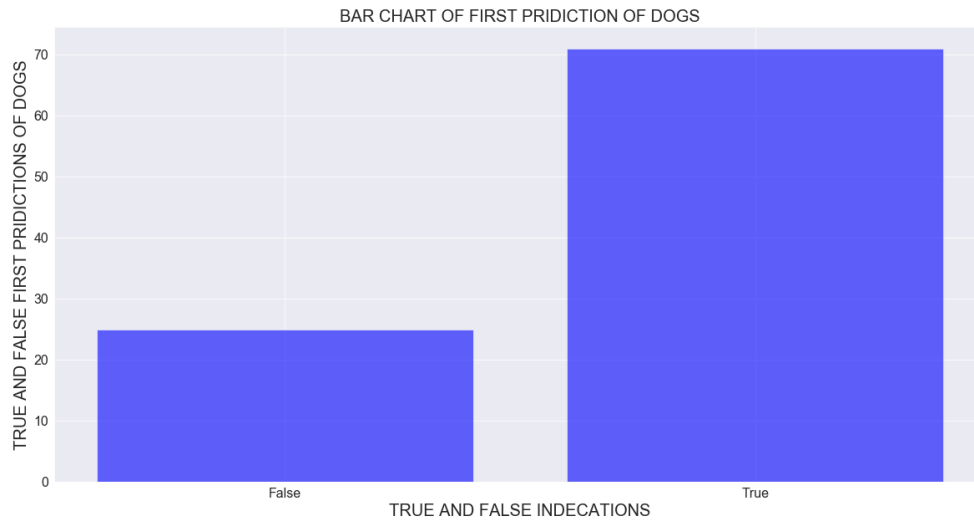

Prediction 2 of dogs

False	24.023155
True	71.780029

Prediction 3 of dogs

False	26.435118
True	69.368066
